E-CERTIFICATE

This is to certify that **Asad zaman, Aqsa Erum, Haider AsadUllah, Abdullah** have successfully completed their ACCP Semester I E-Project.

Submitted to: Aptech Computer Education
On

MONDAY, OCT, 14, 2024

A handwritten signature in black ink, consisting of a series of loops and a long vertical stroke.

Acknowledgment

First of all we would like to thank Almighty Allah for giving us strength and ability to complete this project. And then, we would like to express my special thanks of gratitude to our teacher Miss Arshia who guided us on the project

Wilson sport which also helped us in doing a lot of new learning and we came to know about so many new things, we are really thankful to him. We are highly thankful to MISS Arshia for his guidance and constant supervision as well as for providing necessary information regarding the project & also for his support in completing the project. Lastly, we would also like to thank our parents and friends who helped us a lot in finalizing this project within the limited time frame. We also express our sincere gratitude to E-Project team from Aptech Head Office, for their valuable guidance and support for the completion of this project. We earnestly hope that this project will provide all the necessary information required by the user to fulfill his/her inspiration. However, suggestion and feedback for improvements will be thankfully welcomed & acknowledged.

Introduction

The thirst for learning, upgrading technical skills and applying the concepts in real life environment at a fast pace is what the industry demands from IT professionals today. However busy work schedules, far-flung locations, unavailability of convenient time-slots pose as major barriers when it comes to applying the concepts into realism. And hence the need to look out for alternative means of implementation in the form of ladder approach.

The above truly pose as constraints especially for our students too! With their busy schedules, it is indeed difficult for our students to keep up with the genuine and constant need for integrated application which can be seen live especially so in the field of IT education where technology can change on the spur of a moment. Well, technology does come to our rescue at such times!!

Keeping the above in mind and in tune with our constant endeavour to use Technology in our training model, we at Aptech have thought of revolutionizing the way our students learn and implement the concepts using tools themselves by providing a live and synchronous eProject learning environment!

What's This E-Project

eProject is a step-by-step learning environment that closely simulates the classroom and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to

Practice step by step i.e. ladder approach.

Build a larger more robust application.

Usage of certain utilities in applications designed by user.

Single program to unified code leading to a complete application.

Learn implementation of concepts in a phased manner.

Enhance skills and add value.

Work on real life projects.

Give a real life scenario and help to create applications more complicated and useful.

Mentoring through email support.

The students at the centre are expected to complete this eProject and send complete project along with the documentation to eProjects Team

Looking forward to a positive response from your end!!

Objectives of the Project

The Objective of this program is to give a sample project to work on real life projects. These applications help you build a larger more robust application. The objective is not to teach you JavaScript/Dreamweaver but to provide you with a real life scenario and help you create basic applications using the tools.

You can revise the chapters before you start with the project.

This project is meant for students who have completed the module of Dreamweaver. These programs should be done in the Lab sessions with assistance of the faculty if required.

It is very essential that a student has a clear understanding of the subject. Students should go through the project and solve the assignments as per requirements given.

Kindly get back to eProjects Team in case of any doubts regarding the application or its objectives.

Problem Statement

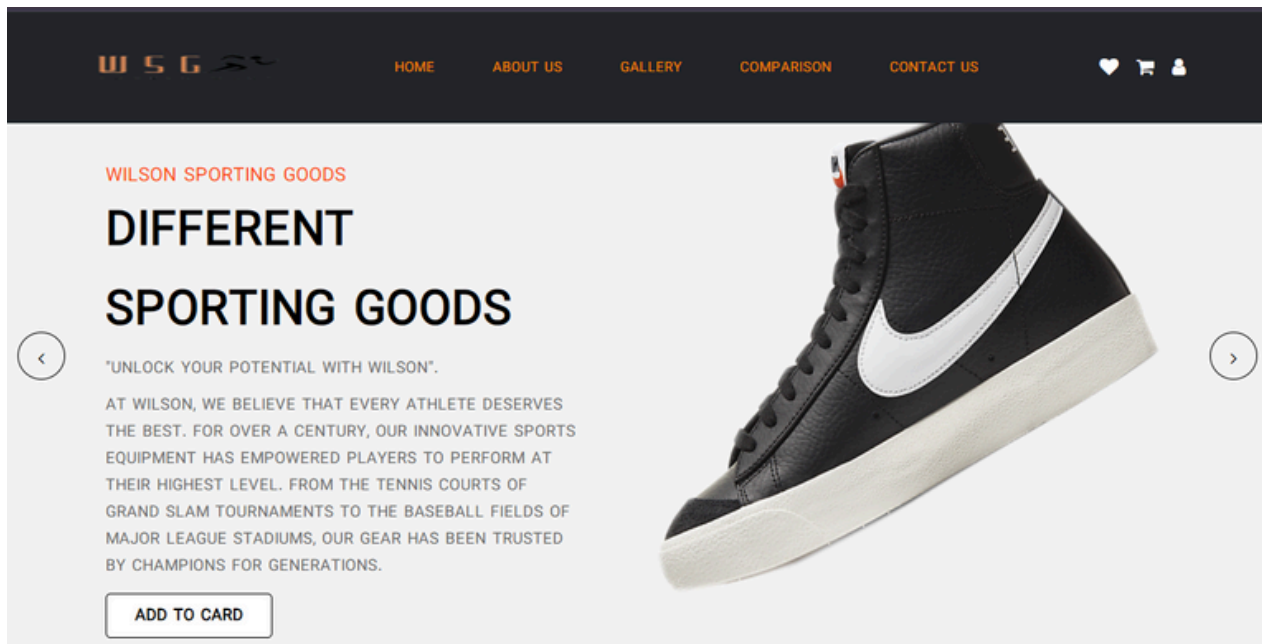

WILSON SPORTING GOODS is selling various types of Sports Goods. The company advertises by distributing the pamphlets, advertising on television and so on. Due to rapid development in internet field, the company decides to launch a website where people will get all the information about the various products available with them easily.

Requirement Specification

The Web site is to be created based on the following requirements.

- 1) The Home Page should be created with proper sections and with a suitable logo.
- 2) Home Page should contain details of Sports Goods with suitable images.
- 3) The site should display a menu which will contain the options for brief introduction about the various sporting goods available, location of the shop and any other information if required.
- 4) The information should be categorized according to the brand names of the products like if a User wants to see only “REEBOK” products or any other companies products then he/she can click on a Link/button/menu etc and can see only that Brand products.
- 5) When a user selects any particular brand, a list of products for that brand will be displayed
- 6) A brief summary of features of individual products should be displayed on the Web Page along with the product but detailed Features should be stored in Individual Word documents which can be downloaded or viewed by the User who wishes to see the same.
- 7) The user should also be able to compare the various products of different as well as similar brands.
- 8) There should be a “Contact Us” page which will have the Address of the Company which is as follows and the mail address which when clicked will invoke the local mail client from where they can send an email.
